PERSONAL PROJECTS

StreamEz
- A fictional streaming website done with basic HTML,CSS and JavaScript.
- It has a landing page followed by services, pricing, happy clients and contact us pages.
- The website is made responsive using Bootstrap features.
- Website Link : https://atreyiguha.github.io/ ↗

My Portfolio
- This website is my personal portfolio having all the projects I have done so far in Front End Development.
- Following the home page, it has the qualifications, blogging and services page and all the pages have working hyperlinks.
- This website also has dark mode available and option of eye soothing colour for a better user experience.
- Website Link : https://atreyiguha.github.io/portfolio/ ↗

To Do List
- This website is made to encourage organization of tasks and keeping a track of them in order.
- Made with pure HTML, CSS, Bootstrap and JS, this site adds tasks and deletes them when they are completed.
- Website Link : https://atreyiguha.github.io/todolist/ ↗

Patatap Clone
- This is a clone of the original Patatap Website.
- I have used extensive paper-js for all the sound effects used.
- Every key stroke generates a specific sound and circular pattern.
- Website Link : https://atreyiguha.github.io/patatapclone/ ↗

WORK EXPERIENCE

Web Development Intern
RC Diamonds
07/2020 - 10/2020   *Mumbai, India*
Achievements/Tasks
- I was given to work on WordPress with the instructed plugins and improve websites with integrated Css and Html.
- Developed several websites successfully using Bootstrap templates and pure JavaScript.
- Hands-on Experience in handling live websites.
